Key Placement Guidelines

Device thickness 0.75" (uniform), corner radius 1.5" (plan view), corner radius approx. 1.0" (side view)

Notes:

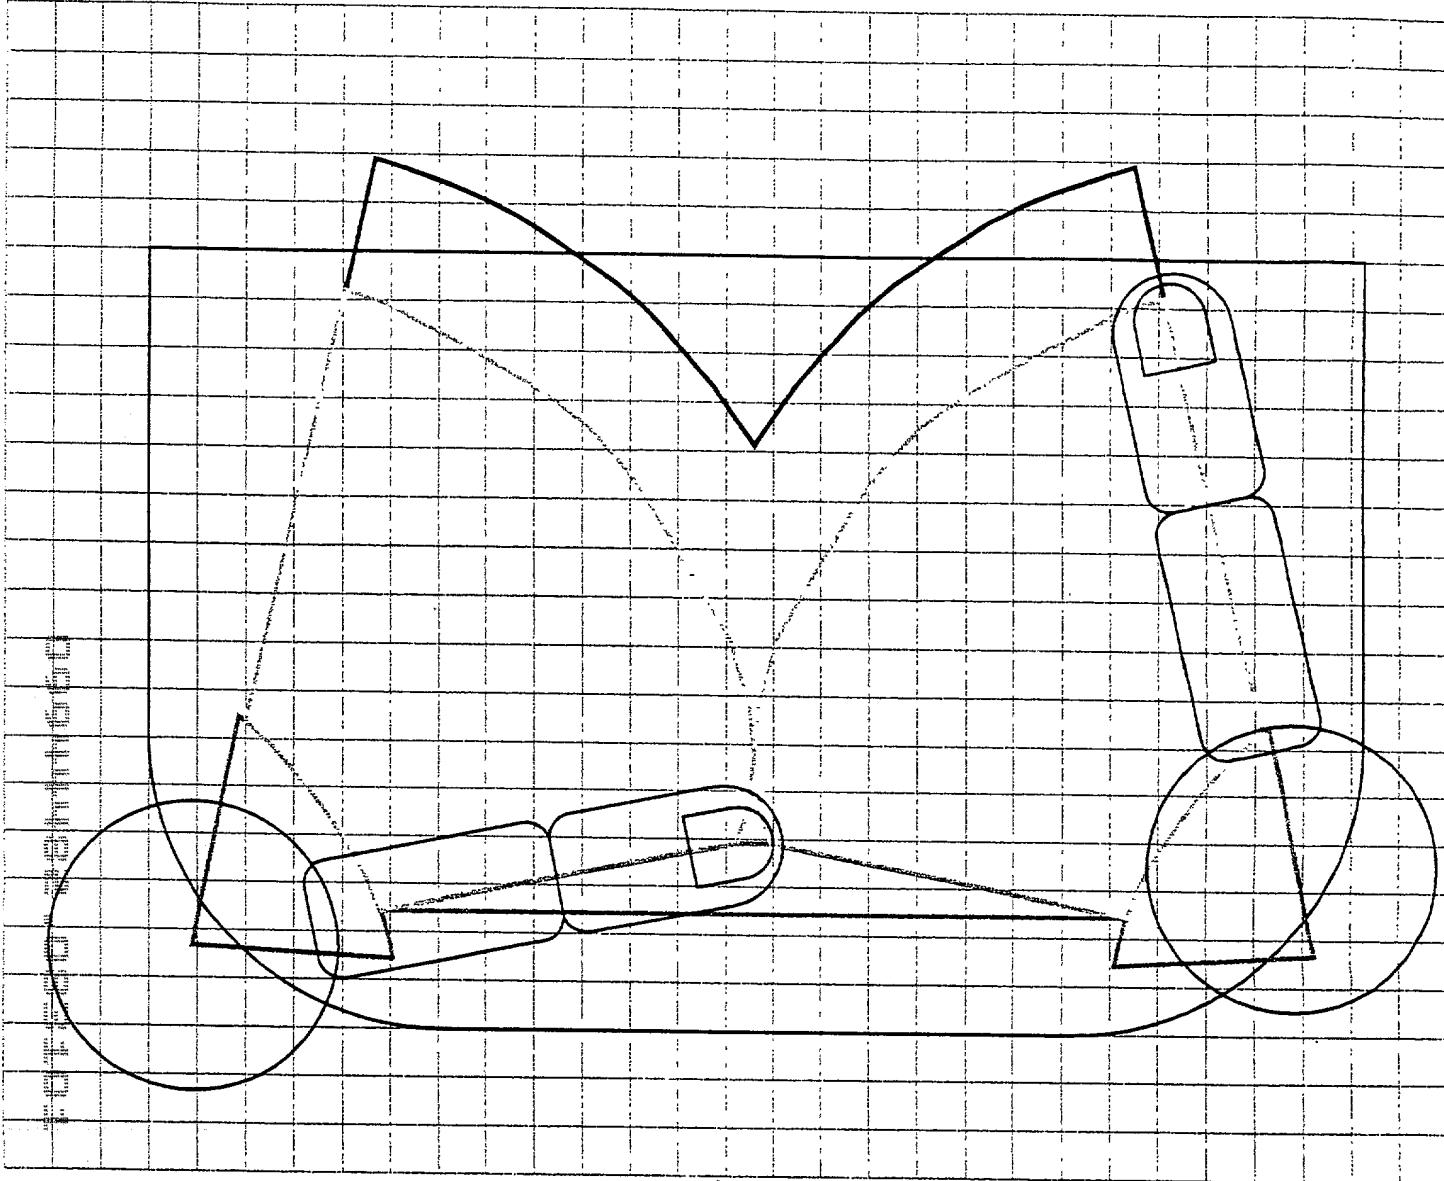

- For device thickness of 0.75 in., keying area width is approx. 5.5 in.
- Reach areas are valid for placement of thumbs at corner or along sides
- Smaller corner radii decrease reach areas but permit easier reach into blue areas
- Device thicknesses greater than 0.75 in. quickly decrease size of reach areas
- Reach plots generally indicate a device width of approx. 6.0 in.

3. Rotated the reach envelope approx 15° to more closely resemble the hand posture of holding a game controller.
